

prism LITE

THE BOCADA PRISM PLATFORM: Bocada Prism is the first and only data protection service management solution purposely built to intuitively drive users through the multi-phased Data Protection

Service Management process. The Prism platform includes multiple modules to address each phase including Health Check, Policy Management, SLA Management and Change Management. Prism enables assessment of the overall data protection delivery infrastructure effectiveness, improves the ability to deliver quality data protection and recovery services, and publishes the results to customers to continuously advance the effectiveness of data protection operations while lowering costs.

PRISM LITE: Prism Lite is a data protection reporting and troubleshooting solution which provides the ability to determine the overall health of the data protection environment. Prism Lite provides the functionality of the Health Check Module of the broader Prism platform, enabling IT and MSP users to determine how well the data protection environment is performing, troubleshoot problem areas and understand performance trends over time to help determine inconsistencies in backup performance and identify opportunities for improvement.

PRISM LITE IS AVAILABLE IN BUNDLES OF THE FOLLOWING QUANTITIES:

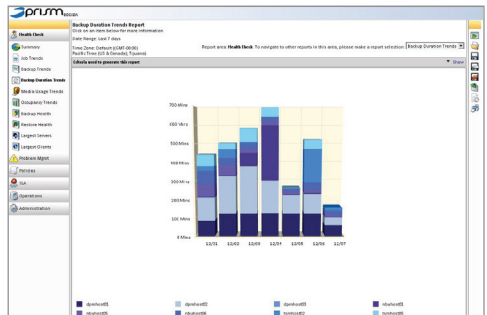

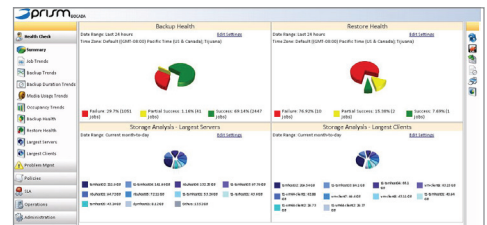

- Prism Lite 1: Up to 100 clients
- Prism Lite 2: Up to 250 clients
- Prism Lite 3: Up to 500 clients

Prism Lite is fully upgradable to the full Prism platform which provides additional functionality for advanced:

- Problem Management
- Policy Management
- SLA Management
- Change Management

Prism Lite Provides

- Customizable user dashboard which provides visibility into the overall health of the data protection environment.
- Immediate visibility into recent and long-term backup trends.
- Drill-down capabilities for problem diagnosis.
- The ability to determine capacity use by server and client.
- Backup, backup duration, occupancy and media use trends to aid in job scheduling, capacity management and policy management.
- Ability to share reports with stakeholders either through web login or email.
- Role Based Security.
- Full zoning functionality (view by geography, department, application, etc.).

WORKS WITH MOST MAJOR

BACKUP APPLICATIONS INCLUDING:

IBM, TSM, Symantec NetBackup, Backup Exec and PureDisk, EMC NetWorker and Avamar, Microsoft DPM, CA ARCserve, NetApp*, HP DataProtector, Commvault Galaxy*, Syncsort Backup Express and many more.

* Not subject to the Bocada Support Services Terms and Conditions.

Report Descriptions

- **HEALTH CHECK DASHBOARD** – Provides an overall view of backup activity. Any of the following reports may be shown in the dashboard.
- **BACKUP HEALTH** – Provides a view of overall success and failures in the environment.
- **RECOVERY HEALTH** – Displays the results of all recoveries run.
- **JOB TRENDS** – Allows users to identify failed jobs and quickly take corrective action.
- **BACKUP TRENDS** – This report is instrumental in both storage planning and optimization.
- **BACKUP DURATION TRENDS** – Helps address the ongoing challenge of meeting backup windows.
- **MEDIA USAGE TRENDS** – Analyze the impact of backup trends on media volumes over time.
- **OCCUPANCY TRENDS** – Predict future storage needs and measure the impact of changes to backup policy.
- **STORAGE ANALYSIS: LARGEST SERVERS** - View top 10 users of storage capacity.
- **STORAGE ANALYSIS: LARGEST CLIENTS** - View top 10 client users of storage capacity.

Technical Requirements

- | | | |
|------------------|-----------------------|------------------------|
| » ASP.net | » Windows Server 2003 | » SQL Server 2005 |
| » .NET 3.5 SP1 | SP2 or 2008 SP2 | SP2 or SQL Server 2008 |
| » IIS 6 or IIS 7 | | |

Internet Explorer 7 or Internet Explorer 8 are supported for the Bocada Prism Web Interface
