COMPLIANCE REPORTING

UNPROTECTED ASSET IDENTIFICATION

TICKETING AUTOMATION

SECURITY THREAT DETECTION

Monitor Backups

Get the key on-prem and cloud backup performance metrics you need, when and how you need them. Enjoy highly-configurable, scheduled reports to simplify reporting and centralize oversight.

Audit Performace

Create detailed compliance reports for any period, geography, server group, or backup product in minutes. Leverage a wholly independent solution to prove your data protection adherence.

Protect Resources

Identify unprotected assets and streamline failure workflows for optimum data resiliency. Stay one step ahead of issues impacting data restorability with zero incremental labor hours.

Mitigate Risk

Use programmable automated alerting, unusual backup behavior detection, and automated ticketing to fix failures faster and get ahead of data protection challenges.

BOCADA

FEATURE SUMMARY

- ▶ Agentless, automated, single-pane monitoring
- ▶ 40+ cloud, on-prem, and endpoint backup products supported
- ▶ Native integration across key enterprise ticketing software
- ▶ Native integration with asset inventory solutions
- ▶ 60+ customizable report templates
- ▶ Unprotected asset identification
- ▶ Executive summary dashboard
- ▶ Automated, customizable report creation and distribution
- ▶ Historical backup performance reporting
- ▶ Historical recovery reporting
- ▶ Unusual backup byte variance reporting
- ▶ In-progress backup job activity reporting
- ▶ Capacity and storage usage reporting
- ▶ Storage trends and forecasting
- ▶ SLA, KPI & compliance tracking
- ▶ Critical failure and storage spike alerting
- ▶ Unlimited historical data retention
- ▶ Configurable client and server segmenting
- ▶ User and product activity tracking
- ▶ Role-based access control (RBAC)
- ▶ Open database for direct SQL access

TECHNICAL REQUIREMENTS

- ▶ Windows Server
- ▶ SQL Server
- ▶ IIS
- ▶ Data collection requirements vary by backup product
